SECRET

- 2 -

- 4. All construction work on projected buildings was stopped as from 1 January 1955 owing to shortage of money. Only the smithy was permitted to be finished.
- 5. On 1 January 1955 a new wage scale came into force. All those responsible for the fulfillment of the plan and quality of the products (head foremen, foremen, head inspectors, inspectors, maintenance leaders, leaders of departments) were to receive 100 percent premium over and above their monthly wages, dependant on the 100 percent fulfillment by their departments of the plan, with no slipshod work or sabotage. Should the section or department not fulfill the plan owing to damaged machinery, slipshod work, sabotage, etc., all responsible persons in it would receive only the basic pay (i.e. 1460 crowns) allotted to the TM 8 wage group.
- 6. Expert workers with 10 or more years of experience receive basic wages of about 1,200 1,300 crowns. Every job is timed, and when the work goes smoothly, with no hitches, and the product is accepted by the inspectors, the workers receive the full premium quoted for that particular operation. These expert workers can earn up to 2,500 crowns monthly before deductions. Younger workers receive lower basic wages, but the premium system is the same as that outlined above.
- All the workers, experts, and technicians are complaining bitterly about
  these new wage adjustments. In effect it means that their total monthly
  earnings have been lowered by about 1,000 crowns by comparison with earnings
  in 1954.
- 8. There are frequent meetings of the factory Communist Party and Czechoslevak Youth Organization (CSM) units. Very few people attend these meetings, and quite often the only people present are the functionaries and organizers.
